Temperature Probe

EBT - IF1 / EBT - IF2 /

EBT - IF3

- Internal Pt1000 sensor
- Housing made of stainless steel
- Long-term temperature monitoring

Characteristics

The EBT - IF is used for long-term temperature monitoring. The temperature sensor as well as the EASYBus electronics are integrated in the compact probe.

The temperature is measured by the internal Pt1000 sensor, the measuring values and min-/max- values can be read out via EASY-Bus interface.

The housing of the probe is made of stainless steel to guarantee optimal corrosion protection. The measuring range, fitting length, probe tube diameter and other parameters of the probes can be modified according to customer preferences. The probes can be configured by means of the EASYBus-Configurator software.

Temperature Module

EBT - AP1 / EBT - AP2 /

EBT - AP3 / EBT - AP4 /

EBT - AP5

- Internal Pt1000 sensor
- Robust ABS housing
- Long-term temperature monitoring

Characteristics

The EBT - AP is used for long-term temperature monitoring. The sensor module is particularly suitable for industrial applications due to its robust design.

The temperature is measured by the internal Pt1000 sensor, the measuring values and min-/max- values can be read out via EASY-Bus interface.

The housing of the module is made of robust ABS. For example fitting length or probe tube diameter of the probes can be modified according to customer preferences. Direct configuration is possible for devices with option VO (on-site display). Additionally there is the possibility to configure the modules by means of the EASY-Bus-Configurator software.

Design types

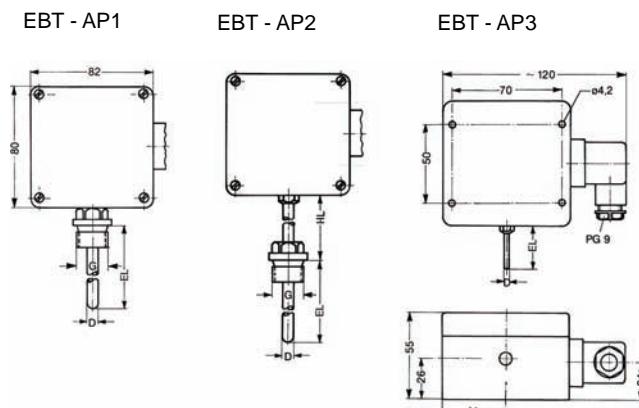

EBT - AP1	with thread G for direct screw-in
EBT - AP2	for higher temperatures, with thread G in distance to housing, with neck tube length HL
EBT - AP3	indoor / outdoor module for wall mounting (varnished electronics necessary for outdoor application)
EBT - AP4	duct probe with centrally mounted sensor tube pointing downwards

EBT - AP5	Transmitter for already existing Pt1000 sensors or if housing has to be in distance to sensor (e.g. due to very high ambient temperatures or constructional necessities)

Characteristics

The EBT - 2R /2RE is used for long-term temperature monitoring, indoor climate monitoring and monitoring of storage rooms.

The temperature is measured by the internal Pt1000 sensor (EBT - 2R) or external Pt1000 probe (EBT - 2RE), the measuring values and min-/max- values can be read out via EASYBus interface.

The housing of the module is made of robust ABS. Modules are available with or without on-site display. The modules can be configured by means of the EASYBus-Configurator software. Additional direct configuration is possible for devices with option VO (on-site display). The control panel is accessible when the cover is removed.
